## Glucosamine and chondroitin liquid form

©2020 Walmart Stores, Inc. Supplement Facts serving size: 1 tablespoon (15 mL) serving per container: approximately 32 Description amount per serving % daily value \* Percentage daily values based on 2000 calories diet.† Daily value has not been established. Calories 15 Total carbohydrates 4 g 1%\* Vitamin C (ascorbic acid) 125 mg 139% mangan (mangan amino acid chelate) 4 mg 174% Sodium 95 mg 4% glucosamine HCl † chondroitin sodium sulphate (of bovine cartilage) 600 mg † MSM (methylsulfonyl methane) 150 mg † Other ingredients: de-ionized water, plant glycerol, Fructose, Natural flavours, malic acid, Citric acid, Xanthan gum, potassium sorbate (as a preservative) and natural beta-carotene. Contains shellfish (crab, crab, lobster, crab). Natural beta-carotene contains refined soybean oil. It's not made of wheat, gluten, milk, eggs or fish. It is produced in a GMP facility which processes other components containing these allergens. Warning: People known to be allergic to shellfish should not use this product. Adults only. Consult with your doctor if you are pregnant/nursing, taking medication or have a medical condition (especially glaucoma). Keep out of the reach of children. NOW Foods has developed the glucosamine test method, which has been chosen as the official AOACI industry standard method. The product may cause a natural color variation. Family-owned since 1968. © 1996-2014, Amazon.com, Inc. or its affiliates Each 20ml (approx. 2 capfuls) serving fruit flavored beverage concentrate diluted with water contains 888mg of glucosamine and 1500mg of glucosamine sulphate 2KCl & 1200mg chondroitin sulphate. Shake thoroughly before use. Take 20ml (about 2 capfuls) per day, diluted with 4 parts of water or juice. It's best served refrigerated. Allergy advice: Fish (crustaceans) contains water, fructose, D-glucosamine sulphate 2KCl (crustaceans), chondroitin sulfate, mixed fruit flavour, citric acid, potassium sorbate. Free shipping on orders over £20 to £3.45 for orders under £20 Pick up your order from Power Health Head Office Safe & Secure payments of £11. Delivery times change. © 1996-2014, Amazon.com, Inc. or affiliates If you are taking any prescribed medications or any medical conditions always consult with your doctor or pharmacist before taking vitamins or supplements. Dietary supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. Store in a cool, dry place, in original packaging, out of the reach of young children. After opening, cool and use within six weeks. If you experience a side effect, stop taking the supplement and seek medical advice. Purified water, fructose, Optiflex glucosamine (glucosamine hydrochloride), flavouring (blackcurrant juice concentrate), chondroitin sulphate, acidifier: trisodium citrate, ascorbic acid, OptiMSM (methyl sulfonate methane, silica), preservatives: malic acid, sweetener: sucralose. Shake thoroughly before use. A dessert dessert daily (10ml), diluted in a glass of water. The recommended input should not be exceeded. Millions of people in the United States suffer from osteoarthritis (OA) and joint pain. In fact, the Centers for Disease Control and Prevention (CDC) reports that 54 million people have some form of arthritis, which is about 23% of adults. Of them, about 25% say that discomfort and pain are severe. Fortunately, glucosamine and chondroitin are widely accepted as the best joint supplements, and these ingredients make up 98% of the Synflex formula. Glucosamine is a naturally occurring amino sugar in the body that helps maintain common health. As we age, it produces less glucosamine and suffer from a decrease in joint health. However, an injury that damages the common structure is also welcome secondary osteoarthritis. As one of the best common supplements on the market, Synflex's liquid glucosamine formula offers pharmaceutical grade glucosamine and chondroitin. Clinical studies are clear that glucosamine and chondroitin produce glycosaminoglycans that help rebuild damaged cartilage. These studies have also indicated that glucosamine and chondroitin reduce or eliminate pain completely. Chondroitin is another naturally occurring substance that the body uses to build cartilage and promote healthy joints. Like glucosamine, the body produces less chondroitin as we age. While you can buy small amounts of chondroitin by eating meat, it may not be enough to support your joint health. Synflex's daily intake significantly increases the intake of this essential protein molecule. Chondroitin attracts nutrients to the joints so that the cartilage absorbs them. It also increases the flow of fluid to the cartilage to improve flexibility and actively blocks enzymes that damage the cartilage. Chondroitin is widely known as one of the best joint supplements because it has anti-inflammatory properties and increases the effectiveness of glucosamine. For these reasons, Synflex can be useful in alleviating symptoms of arthritis. By clicking accept, you agree to the use of Healthspan cookies. For more information, please refer to our cookie policy
